

Organic Wheat Grass

Wheatgrass is jam packed with vitamins A,C,E, K, B complex, and B-17 and three times the amount of vitamin E as dry wheat. Wheatgrass is also a natural detoxifier and is equal in nutrients to 2.5 pounds of vegetables. Wheatgrass juice is truly a superfood. It is used as an alternative cancer treatment, removes toxins from the body, increases red blood cell count, and improves vision and concentration... all it takes is 1 ounce per day.

Wheatgrass is also used for decorating as it resembles grass and ours is grown hydroponically. There is no messy soil to handle! It's easy to cut through the roots to form centerpieces and fit flower arrangements.
